

Asoni360 Standalone NVR

Digital PTZ solution without any moving part

- Offer instant PTZ, auto-pan and many powerful features for live and playback video

The diagram illustrates the components of the Asoni Standalone 360° solution. On the left, three items are listed with plus signs between them: a Fish Eye Lens, Support IP Camera (two models shown), and Asoni Standalone360 (a server rack). A large arrow points from these components to a 360-degree view of a large indoor space, labeled 'Source View'. The view is split into four quadrants, showing a wide-angle perspective of a modern building interior with a large, ornate ceiling and several columns.

Asoni Standalone 360° Solution

- Just only use one camera instead of installing speed dome or many cameras
- Save total cost and efforts by reducing number of camera, installation, cabling, configuration and maintenance needs
- Only requires one IP camera bandwidth & storage, which reduces 50% ~ 60% network traffic and storage capacity
- Support multiple-type lens with 180° and 360° without blind spot
- Real-time tracking of suspected event by point and click. No mechanical delay
- On-screen PTZ not only for live-view monitoring but also for snapshot and playback modes
- Create DVR/Snapshot portable file without installing full Asoni360 system program
- Support multiple languages
