Asoni360 Solution

Main Features

- Just only use one camera to instead of installing speed dome or many cameras.
- Save total cost and efforts by reducing number of camera, installation, cabling, configuration and maintenance needs.
- Only requires one IP camera bandwidth & storage, which reduces 50% ~ 60% network traffic and storage capacity.
- Various and flexible window-split arrangement based on users' demands.
- Support multiple-type lens with 180° and 360° without blind spot
- Real-time tracking of suspected event by point and click. No mechanical delay
- On-screen PTZ not only for live-view monitoring but also for snapshot and playback modes.
- Create DVR/Snapshot portable file without install full Asoni360 system program
- Support multiple languages
